TRIVIA TRIVIA

- "Trivia" is actually the plural form of the word "trivium." So, technically, when we say a trivia question or a piece of trivia, we could actually refer to these as a trivium. We don't, and people would think you were weird if you did, but you could.
- It wasn't until the 20th century that we began to associate trivia with random factoids like we do now. Specifically, in British aphorist Logan Pearsall Smith's book, "Trivialities: Bits of Information of Little Consequence," first published in 1902 and popularized in 1918, we have the first recorded use of the term "trivia" as we think of it today.
- The world's first trivia quiz book is usually regarded to be "Ask Me Another!: The Question Book," written by Justin Spafford and Lucien Etsy, published in 1927.
